

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 01 – HOME (Hero Section)

Purpose

The Hero Section is the first impression of Vistaar and must instantly communicate the company's identity, capabilities, and vision.

Within the first five seconds, visitors should understand that Vistaar is **an AI-powered Brand Growth Company** that helps businesses build, launch, market, automate, and scale.

The Hero Section should inspire confidence, curiosity, and action while maintaining a premium, technology-first appearance.

Objectives

The Hero Section should answer four questions immediately:

- Who is Vistaar?
- What does Vistaar do?
- Why should someone trust Vistaar?
- What should the visitor do next?

Visual Experience

The Hero Section should feel modern, immersive, and interactive rather than static.

Background

Use a full-screen animated background featuring:

- Animated mesh gradients
- Glassmorphism overlays

- Floating geometric shapes
- Soft particle animations
- Dynamic light effects
- Subtle grid pattern
- Mouse-responsive movement
- Floating service icons
- Smooth parallax effects

The background should never use generic business stock images.

Navigation Bar

Behaviour

- Sticky navigation
- Transparent on page load
- Converts into a blurred glass navigation after scrolling
- Smooth transition (300–400ms)

Logo

VISTAAR Logo

Below the logo (desktop only)

Building Brands. Growing Businesses.

Navigation Menu

- Home
- Services
- Our Story
- Careers
- Case Studies
- Contact

Primary CTA

Book a Strategy Call

Hover Effect

- Slight elevation
- Soft glow
- Background gradient animation
- Cursor interaction

Hero Badge

Positioned above the main headline.

Suggested text:

AI-Powered Brand Growth Company

Alternative versions can be rotated seasonally:

- Strategy. Technology. Growth.
- Your Long-Term Growth Partner.
- Building Tomorrow's Businesses.

Main Headline

The headline should always remain:

Building Brands.

Growing Businesses.

Typography should be bold, clean, and highly readable.

Supporting Description

Vistaar partners with startups, founders, and businesses to create impactful brands, modern websites, intelligent AI solutions, and scalable growth systems that transform ideas into successful businesses.

The copy should remain concise and focused on business outcomes rather than simply listing services.

Service Highlights

Display these as animated floating badges beneath the description.

- Branding
- Business Consulting
- Website Development
- App Development
- SaaS Development
- AI Automation
- Digital Marketing

- Personal Branding
- Creative Studio
- Growth Strategy

Each badge should reveal a one-line description on hover.

Primary Call-to-Action Buttons

Button One

Start Your Project

Purpose:

Direct users to the contact/project enquiry page.

Button Two

Book a Strategy Call

Purpose:

Open a calendar booking interface.

Button Three

Explore Our Work

Purpose:

Smooth-scroll to the portfolio section.

Hero Illustration

Instead of using a stock photograph, create an interactive visual centred around the Vistaar ecosystem.

The illustration should show Vistaar connected to its core capabilities:

- Branding
- Strategy
- Websites
- AI
- Marketing
- Automation
- Analytics
- Growth

Each node should have a subtle floating animation and connecting lines that gently pulse to suggest continuous progress.

Trust Indicators

Below the CTA buttons, display four concise trust statements.

- AI-Driven Solutions
- Strategy Before Execution
- End-to-End Business Partner
- Built for Long-Term Growth

These should appear with small icons and fade into view as the page loads.

Micro Interactions

The Hero Section should include:

- Magnetic CTA buttons
- Smooth hover transitions
- Floating icons
- Animated gradients
- Soft shadows
- Cursor-follow lighting effect
- Scroll indicator animation

Animations should remain elegant and never distract from the content.

Scroll Indicator

At the bottom centre of the Hero Section.

Animated arrow with text:

Discover Our Story

Clicking it should smoothly scroll to the next section.

Responsive Requirements

Desktop

- Full-height hero (100vh)
- Two-column layout
- Illustration on the right
- Content on the left

Tablet

- Illustration moves below the content
- Navigation collapses into a hamburger menu

Mobile

- Single-column layout
- Larger tap targets
- Simplified animations
- Optimised background effects for performance

Performance Requirements

- Largest Contentful Paint (LCP) under 2.5 seconds
- Lazy-load animations and illustrations
- Optimise all images using WebP/AVIF
- GPU-accelerated animations only
- Maintain 90+ Lighthouse score

SEO Requirements

H1

Building Brands. Growing Businesses.

Supporting Keywords

- AI Brand Growth Company
- Branding Agency
- Website Development
- Business Consulting
- AI Automation
- SaaS Development
- Digital Marketing

The Hero Section should include semantic HTML, structured metadata, and accessible text for all interactive elements.

Success Criteria

A successful Hero Section should leave visitors with three clear impressions:

1. Vistaar is modern and trustworthy.
2. Vistaar solves complete business growth problems—not isolated marketing tasks.
3. Visitors know exactly how to start working with the company through clear calls to action.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 02 — WHO WE ARE

More Than an Agency. Your Growth Partner.

Purpose

After capturing the visitor's attention through the Hero Section, the second section should answer the most important question:

"Why should I trust Vistaar with my business?"

Instead of introducing Vistaar like a traditional agency with a long paragraph, this page should create a storytelling experience.

Visitors should feel that Vistaar doesn't simply offer services—it partners with businesses to build sustainable, scalable growth systems.

The section should be interactive, visually engaging, and easy to explore.

Design Philosophy

This section should feel like a conversation rather than a brochure.

Instead of scrolling through large blocks of text, users should interact with cards, animations, and illustrations that reveal Vistaar's story step by step.

The experience should encourage curiosity and make visitors spend more time on the website.

Section Title

More Than an Agency.

We Build Businesses That Grow.

Supporting Text

Every successful business starts with an idea, but ideas alone don't create growth.

At Vistaar, we combine strategy, creativity, technology, AI, and marketing to transform ideas into brands that people remember and businesses that continue to grow.

Layout Structure

Desktop Layout:

- Left Side → Interactive Question Cards
- Right Side → Animated Illustration / 3D Visual

Mobile Layout:

- Illustration on top
- Question cards stacked vertically
- Smooth accordion animations

Interactive Question Cards

Instead of displaying all information at once, the user interacts with four premium cards.

Only one card should remain expanded at a time.

When a card is clicked:

- Card expands smoothly
- Illustration changes dynamically
- Icons animate
- Supporting content fades into view
- Background gradient changes subtly

Card 01

Who Are We?

Objective

Introduce the identity of Vistaar.

Content

Vistaar is an AI-powered Brand Growth Company that helps startups, founders, and established businesses create meaningful brands, powerful digital experiences, and scalable business systems.

We don't believe in offering isolated services.

Instead, we build complete ecosystems where branding, technology, automation, and marketing work together to achieve measurable business growth.

We become long-term partners, not short-term service providers.

Suggested Illustration

A growing tree.

Roots represent:

- Strategy
- Research
- Innovation

Branches represent:

- Branding
- Websites
- Marketing
- AI
- Growth

This symbolizes that strong businesses grow from strong foundations.

Card 02

What Do We Do?

Objective

Explain Vistaar's offerings through storytelling instead of listing services.

Content

We help businesses at every stage of their journey.

Whether you're launching a startup, refreshing your brand, developing a website, automating workflows, scaling marketing campaigns, or expanding into new markets, Vistaar provides the expertise and technology needed to support that growth.

Our work combines creative thinking, business strategy, software development, AI solutions, and performance marketing into one connected ecosystem.

Supporting Service Icons

- Brand Identity
- Website Development
- Mobile Apps
- SaaS Products
- AI Automation
- Business Consulting
- Digital Marketing
- Personal Branding
- Creative Design
- Analytics

Each icon should animate when hovered.

Card 03

How Do We Work?

Objective

Demonstrate Vistaar's structured approach.

Content

Every successful project follows a proven process.

We begin by understanding your business, customers, competitors, and goals.

From there, we develop a strategy tailored to your vision before moving into design, development, marketing, and continuous optimization.

Growth isn't achieved through one campaign—it comes from building systems that evolve with your business.

Process Timeline

1. Discover
2. Research
3. Strategy
4. Design
5. Develop
6. Launch
7. Optimize
8. Scale

Each step should appear with a connecting animated line.

Clicking on a step briefly explains its purpose.

Card 04

Why Choose Vistaar?

Objective

Explain what differentiates Vistaar from competitors.

Content

Businesses today need more than a website or social media presence.

They need strategy.

They need technology.

They need automation.

They need a partner who understands long-term growth.

That's exactly what Vistaar delivers.

We focus on building businesses that continue growing long after launch.

Differentiators

- ✓ Strategy Before Execution
- ✓ AI-Powered Solutions
- ✓ Technology-Driven Approach
- ✓ Data-Informed Decision Making
- ✓ Long-Term Partnerships
- ✓ Transparent Communication
- ✓ Creative Thinking
- ✓ Scalable Systems

Display these in premium glass cards with subtle hover animations.

Dynamic Illustration Panel

The illustration on the right side should change depending on the selected question card.

Who Are We?

Growing ecosystem tree.

What Do We Do?

Connected business ecosystem.

Branding → Website → Marketing → AI → Growth

How Do We Work?

Animated workflow timeline.

Why Choose Vistaar?

A futuristic dashboard showing business growth metrics, analytics, AI automation, and increasing performance charts.

Micro Animations

Include:

- Card expansion
- Icon rotation
- Floating illustrations
- Animated connecting lines
- Fade transitions
- Gradient background movement
- Mouse hover effects
- Soft lighting

Animations should be smooth, subtle, and premium.

Call-to-Action Section

At the bottom of this page, include a transition section encouraging users to continue exploring.

Heading

Every Brand Has a Story.

Here's How Ours Began.

Supporting Text:

Discover the milestones, experiences, and vision that shaped Vistaar into the company it is today.

Button:

Explore Our Journey

This button scrolls directly to the timeline section on the next page.

Developer Notes

- Build this section as a reusable accordion component.
- Only one card should remain expanded at any time.
- Load illustrations dynamically based on the selected card.
- Ensure animations remain GPU-accelerated for smooth performance.
- Use semantic HTML and ARIA attributes for accessibility.
- Maintain responsive layouts across desktop, tablet, and mobile devices.
- Support keyboard navigation for all interactive elements.
- Keep animation duration between 250–400 milliseconds to preserve a premium feel.

User Experience Goal

By the time a visitor finishes this section, they should clearly understand:

- Who Vistaar is.
- What Vistaar actually does.
- How Vistaar approaches every project.
- Why Vistaar is different from a traditional agency.

The user should feel confident enough to continue exploring the website and begin considering Vistaar as a long-term business partner rather than just another service provider.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 03 — OUR JOURNEY

Every Great Brand Starts With a Vision.

Purpose

After introducing Vistaar and explaining what the company does, this page focuses on **building trust and credibility**.

People don't buy services—they buy confidence.

This section should answer the visitor's next question:

"Can I trust Vistaar with my business?"

Instead of simply displaying achievements, this page should tell the story of how Vistaar was built, the industries it serves, and the impact it has created for clients.

The objective is to transform curiosity into confidence.

Overall Layout

The page should flow like a story with each section naturally leading into the next.

Section Order

1. Our Journey
2. Vision for the Future
3. Industries We Empower
4. Success Metrics
5. Client Testimonials
6. Trusted By
7. Final Call-to-Action
8. Footer

Each section should have generous spacing, scroll-triggered animations, and subtle transitions.

SECTION 01 — OUR JOURNEY

Title

From an Idea to an Ecosystem

Supporting Text

Every company starts with a dream.

Vistaar started with one simple belief:

Businesses deserve more than disconnected services—they deserve a strategic partner that helps them build, grow, and scale.

Today, Vistaar brings together branding, technology, AI, automation, marketing, and consulting under one vision: creating sustainable business growth.

Timeline Layout

Use a **horizontal timeline on desktop** and a **vertical timeline on mobile**.

Each milestone appears as a glass card connected by an animated line.

As users scroll, each milestone fades into view with a subtle upward motion.

Suggested Timeline Milestones

Foundation

The idea behind Vistaar was born with a mission to simplify business growth through technology and strategy.

First Project

Successfully delivered the first client project while establishing a collaborative and quality-focused work culture.

Brand Evolution

Expanded from creative services into complete branding, digital solutions, and growth consulting.

Technology Expansion

Introduced website development, custom software, AI automation, and scalable digital solutions.

Building Partnerships

Focused on long-term client relationships instead of one-time projects, becoming a strategic growth partner.

The Future

Continuously innovating with AI, automation, SaaS products, and intelligent business solutions to help companies scale faster.

Visual Elements

Each milestone should include:

- Icon or illustration
- Short title
- Supporting description
- Year (optional)
- Animated connecting line

Hovering over a milestone should slightly enlarge the card and highlight the connecting path.

SECTION 02 — OUR VISION

Title

Where We're Headed

Supporting Text

Our journey is only beginning.

We envision Vistaar becoming a global growth partner for businesses by combining creativity, technology, and artificial intelligence to solve real-world business challenges.

We don't aim to become the biggest agency—we aim to become one of the most trusted growth partners.

Visual Concept

Display a futuristic roadmap leading toward milestones such as:

- AI Innovation
- Global Clients
- SaaS Products
- Automation Ecosystem
- Strategic Partnerships
- Research & Development

Use animated glowing pathways connecting each milestone.

SECTION 03 — INDUSTRIES WE EMPOWER

Title

Built for Every Industry That Wants to Grow

Supporting Text

Every industry has unique challenges.

Our approach adapts to different markets while maintaining one constant goal: helping businesses achieve sustainable growth.

Grid Layout

Create a responsive grid of interactive industry cards.

Each card should include:

- Icon or custom illustration
- Industry name
- Short description
- Hover animation
- Link to related case studies (when available)

Suggested Industries

Education & Coaching

Helping institutes build trust, improve admissions, and strengthen their digital presence.

Startups

Supporting founders with branding, product launches, websites, AI tools, and go-to-market strategies.

Real Estate

Generating qualified leads through branding, websites, digital campaigns, and automation.

Restaurants & Cafés

Building memorable customer experiences through branding, menus, websites, social media, and marketing.

Healthcare

Creating professional digital experiences while maintaining credibility and trust.

Retail & E-commerce

Helping businesses increase visibility, improve conversions, and scale online sales.

Import & Export

Strengthening international brand presence with modern digital infrastructure.

Personal Brands

Helping creators, entrepreneurs, speakers, and professionals establish a strong online identity.

Technology Companies

Supporting SaaS, software, and AI businesses with product-focused branding and digital experiences.

Manufacturing & Industrial

Creating modern corporate identities and digital solutions for traditional industries.

SECTION 04 — IMPACT IN NUMBERS

Title

Growth You Can Measure

Instead of generic statistics, use animated counters that can be updated from the admin panel.

Suggested Metrics:

- Projects Delivered
- Brands Built
- Websites Launched
- Marketing Campaigns Executed
- Industries Served
- Happy Clients
- Team Members
- Years of Combined Experience

Each metric should animate when it enters the viewport.

SECTION 05 — CLIENT TESTIMONIALS

Title

Trusted by Businesses That Believe in Growth

Display testimonials using premium glass cards arranged in a horizontal carousel.

Each testimonial should include:

- Client photo

- Name
- Designation
- Company name
- Rating (5-star system)
- Written feedback
- Company logo (optional)

Video Testimonials

Reserve a dedicated area for future client video testimonials.

Display:

- Video thumbnail
- Play button
- Client name
- Project type

Videos should open inside a modal without redirecting users.

SECTION 06 — TRUSTED BY

Purpose

Showcase social proof through client logos.

Layout

An infinite scrolling logo wall featuring monochrome logos.

On hover:

- Logos transition to their original colors.
- Slight scale animation.
- Tooltip displaying the company name.

This section should support future additions through the admin panel.

SECTION 07 — FINAL CALL TO ACTION

Background

A full-width premium section with a subtle animated gradient and floating light effects.

Heading

Let's Build Something Extraordinary Together.

Supporting Text

Whether you're launching a startup, reimagining your brand, or scaling an established business, Vistaar is ready to become your long-term growth partner.

CTA Buttons

Primary

Start Your Project

Secondary

Book a Strategy Call

Tertiary

View Our Services

Buttons should feature magnetic hover effects, soft glow animations, and smooth transitions.

SECTION 08 — FOOTER

The footer should act as a mini information hub rather than just a list of links.

Company

- About Vistaar

Copyright

© 2026 Vistaar. All Rights Reserved.

Building Brands. Growing Businesses.

Developer Notes

- Build the timeline, industry cards, testimonials, logo wall, and metrics as reusable components.
- All dynamic content (metrics, testimonials, logos, newsletter text) should be manageable through the admin panel.
- Use lazy loading for logos, videos, and images.
- Implement scroll-triggered animations using performant libraries such as GSAP or Framer Motion.
- Ensure responsive behavior for desktop, tablet, and mobile devices.
- Optimize all media using modern image formats (WebP/AVIF) and defer non-critical assets.

User Experience Goal

By the end of this page, visitors should feel that Vistaar is an experienced, forward-thinking company with a clear vision, measurable impact, and the credibility to become a trusted long-term partner.

The natural next step for the visitor should be to explore **Vistaar's Growth Ecosystem (Services)** to understand exactly how the company can help achieve their business goals.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 04 — GROWTH ECOSYSTEM

Everything Your Business Needs. Under One Vision.

Purpose

This page replaces the traditional "**Services**" page.

Instead of presenting services as isolated offerings, Vistaar should showcase them as a **connected Growth Ecosystem** where every service supports the next.

The objective is to help visitors understand that business growth isn't achieved through a single website, logo, or marketing campaign—it comes from a strategic combination of

branding, technology, automation, marketing, and business intelligence.

By the end of this page, visitors should understand:

- What Vistaar offers.
- How every service connects together.
- Why a complete ecosystem creates better business results.
- Which services are relevant to their business.

Page Heading

Growth Ecosystem

Supporting Text

At Vistaar, every service is designed to work together.

Whether you're launching a startup, scaling an established business, or embracing AI transformation, our integrated ecosystem ensures every decision contributes to measurable growth.

Hero Illustration

Instead of listing services immediately, display an animated ecosystem.

Center Node

VISTAAR

Connected Nodes:

- Strategy
- Branding
- Design
- Development
- Marketing
- AI
- Automation
- Analytics

Hovering over a node should highlight all related services.

Clicking a node smoothly scrolls to its detailed section.

SECTION 01

Business Intelligence

Icon

Growth Chart

Description

Every successful business starts with clarity.

Before designing a website or launching a campaign, we understand your business model, market, competitors, customers, and future goals.

We help businesses make informed decisions through research, planning, and long-term strategic thinking.

Services Included

- Business Consulting
- Startup Consulting
- Business Growth Strategy
- Market Research
- Competitor Analysis
- Digital Transformation
- Revenue Growth Planning
- Go-To-Market Strategy
- Brand Positioning
- Customer Journey Mapping

Deliverables

- Growth Roadmap
- Business Strategy Document
- Market Analysis Report
- SWOT Analysis
- Digital Transformation Plan
- Quarterly Growth Strategy

SECTION 02

Brand Studio

Icon

Description

Your brand is more than just a logo.

It's the perception people have when they think about your business.

We create memorable brand identities that communicate trust, professionalism, and purpose.

Services Included

- Brand Identity Design
- Logo Design
- Brand Guidelines
- Color System
- Typography
- Visual Identity
- Packaging Design
- Stationery Design
- Rebranding
- Employer Branding
- Personal Branding

Deliverables

- Logo Package
- Brand Book
- Brand Guidelines
- Social Media Kit
- Print Assets
- Digital Brand Assets

SECTION 03

Digital Engineering

Icon

Laptop

Description

Technology is the foundation of modern businesses.

Our engineering team creates scalable digital experiences that are secure, responsive, and built for long-term growth.

Services Included

- Website Development
- Landing Pages
- Corporate Websites
- Portfolio Websites
- E-Commerce
- Web Applications
- Mobile Applications
- SaaS Platforms
- Dashboard Development
- API Integration
- CRM Development
- Maintenance & Support

Technologies

- React
- Next.js
- Node.js
- Tailwind CSS
- TypeScript
- MongoDB
- Supabase
- Firebase
- Vercel
- Docker

SECTION 04

AI & Automation Lab

Icon

AI Brain

Description

Businesses shouldn't waste time on repetitive work.

We build AI-powered systems that automate workflows, improve productivity, and enable smarter decision-making.

Services Included

- AI Automation
- AI Chatbots
- Workflow Automation
- CRM Automation
- Email Automation
- WhatsApp Automation
- AI Agents
- Business Intelligence Dashboards
- Process Optimization
- Custom AI Solutions

Business Benefits

- Reduce manual work
- Save operational costs
- Improve customer support
- Faster response time
- Better decision-making
- Increased productivity

SECTION 05

Creative Lab

Icon

Creative Spark

Description

Every interaction with your audience should leave an impression.

Our creative team transforms ideas into visually engaging experiences across digital and physical platforms.

Services Included

- UI/UX Design
- Graphic Design
- Motion Graphics
- Video Editing
- Product Mockups
- Presentation Design

- Social Media Creatives
- Event Branding
- Marketing Collaterals
- Print Design

Deliverables

- Design Systems
- Marketing Assets
- Brand Templates
- Presentation Decks
- Social Media Packs

SECTION 06

Growth Marketing

Icon

Rocket

Description

Marketing isn't about posting every day.

It's about reaching the right audience with the right message at the right time.

We build data-driven campaigns focused on sustainable business growth.

Services Included

- Digital Marketing
- Performance Marketing
- SEO
- Google Ads
- Meta Ads
- LinkedIn Marketing
- Email Marketing
- Content Strategy
- Social Media Management
- Influencer Campaigns
- Analytics & Reporting

KPIs

- Lead Generation
- Conversion Rate
- ROI
- Brand Reach
- Customer Retention
- Website Traffic
- Engagement Rate

SECTION 07

How Everything Connects

Instead of ending the page with service cards, create an ecosystem diagram.

Example:

Business Idea

↓

Business Strategy

↓

Brand Identity

↓

Website Development

↓

Marketing

↓

Lead Generation

↓

AI Automation

↓

Business Growth

↓

Scale

This visualization reinforces Vistaar's positioning as a complete growth partner.

SECTION 08

Why Choose the Growth Ecosystem?

Display six premium glass cards.

Strategy Before Execution

Every project starts with understanding the business, not jumping into design or development.

One Partner. Every Solution.

Branding, technology, AI, marketing, and consulting—all under one roof.

AI-First Thinking

Modern businesses need intelligent systems, not just digital assets.

Scalable Solutions

Every solution is designed to grow alongside your business.

Data-Driven Decisions

We rely on research, analytics, and measurable outcomes rather than assumptions.

Long-Term Partnership

We measure our success by your growth over time, not by the completion of a project.

SECTION 09

Frequently Asked Questions

Create an accordion component with answers to common client questions.

Suggested Questions:

- How long does a website project take?
- Do you work with startups?
- Can you redesign an existing brand?

- Do you offer ongoing support?
- Can I hire Vistaar for a single service?
- What industries do you specialize in?
- How does your AI automation service work?
- Do you provide custom software solutions?

Only one accordion item should be expanded at a time.

SECTION 10

Final Call-To-Action

Heading

Ready to Build Something Bigger Than Just a Website?

Supporting Text

Let's create a brand, build intelligent systems, and design a business that grows with confidence.

Buttons

Primary

Start Your Project

Secondary

Schedule a Discovery Call

UI/UX Recommendations

- Use a dark-to-light animated gradient background.
- Alternate layouts for each service section to create visual rhythm.
- Introduce subtle Lottie animations or custom illustrations for each service category.
- Add hover effects that reveal key outcomes or deliverables.
- Keep iconography consistent with the overall design system.
- On desktop, consider using a sticky left-side navigation that highlights the current service category as the user scrolls.

Developer Notes

- Build each service category as a reusable component.

- Store services, descriptions, deliverables, icons, and FAQs in the CMS/database for easy updates.
- Implement smooth scrolling between ecosystem nodes and service sections.
- Use lazy loading for animations and illustrations.
- Ensure the page remains highly performant despite rich interactions.
- Maintain accessibility with semantic HTML, keyboard navigation, and ARIA labels.
- Optimize for Core Web Vitals and responsive layouts across all devices.

User Experience Goal

By the end of this page, visitors should no longer think of Vistaar as a company that simply "builds websites" or "does marketing."

Instead, they should recognize Vistaar as a strategic growth partner capable of designing, building, automating, and scaling every stage of a modern business through one connected ecosystem.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 05 — THE VISTAAR METHOD

From Vision to Victory.

Purpose

This page is designed to answer one of the biggest questions every potential client has:

"How does Vistaar actually work?"

Many agencies simply list their services without explaining their process. Vistaar should differentiate itself by showcasing a **transparent, strategic, and collaborative workflow**.

The objective of this page is to reassure clients that every project follows a structured methodology, reducing uncertainty and building confidence.

Rather than presenting a simple list of steps, this page should illustrate a **continuous growth cycle** where strategy, execution, optimization, and innovation work together.

Hero Section

Heading

The Vistaar Method

Subheading

Every successful business is built on a process—not guesswork.

Our approach combines research, creativity, technology, and continuous optimization to transform ideas into scalable businesses.

Visual Concept

Instead of displaying the process vertically, use an **interactive horizontal roadmap**.

Each phase appears as a milestone connected by an animated line.

As the user scrolls:

- The current phase lights up.
- The connecting path animates.
- Icons gently pulse.
- Cards expand on hover.

The roadmap should feel like a journey rather than a checklist.

THE GROWTH CYCLE

The process should be presented as a continuous loop rather than a beginning and end, reinforcing the idea that business growth never stops.

PHASE 01

Discover

Objective

Understand the client's business before proposing any solution.

Activities

- Discovery Call

- Business Understanding
- Requirement Gathering
- Target Audience Analysis
- Competitor Research
- Industry Research
- Existing Brand Audit
- Technical Assessment

Deliverables

- Discovery Notes
- Business Requirement Document
- Initial Recommendations
- Project Scope

Estimated Timeline

2–5 Days

Client Involvement

High

PHASE 02

Research & Strategy

Objective

Build a roadmap that aligns technology, branding, and business goals.

Activities

- Market Research
- SWOT Analysis
- Customer Persona Development
- Positioning Strategy
- Brand Direction
- Digital Strategy
- Technology Selection

Deliverables

- Strategy Presentation
- Brand Positioning Document
- User Journey Map
- Technical Roadmap

Timeline

3–7 Days

Client Involvement

Medium

PHASE 03

Brand Experience Design

Objective

Create a visual identity that communicates trust, personality, and professionalism.

Activities

- Logo Design
- Brand Identity
- Typography
- Colour Palette
- UI/UX Design
- Wireframes
- Design System
- Interactive Prototype

Deliverables

- Brand Guidelines
- UI Design
- Prototype
- Design Assets

Timeline

1–3 Weeks

PHASE 04

Engineering & Development

Objective

Transform approved designs into scalable digital products.

Activities

- Frontend Development
- Backend Development
- CMS Integration
- API Development
- Database Design
- Authentication
- Payment Gateway Integration
- Performance Optimization

Deliverables

- Functional Website
- Admin Dashboard
- API Documentation
- Source Code
- Deployment Environment

Timeline

2–8 Weeks

PHASE 05

AI & Automation Integration

Objective

Increase efficiency by integrating intelligent systems into the business.

Activities

- AI Chatbots
- CRM Automation
- Lead Management
- WhatsApp Automation
- Workflow Automation
- AI Agents
- Business Intelligence Dashboard

Deliverables

- AI Workflows
- Automation Reports
- AI Knowledge Base
- Integration Documentation

Timeline

Depends on project scope.

PHASE 06

Testing & Quality Assurance

Objective

Ensure every solution meets Vistaar's quality standards before launch.

Testing Areas

- UI Testing
- Functional Testing
- Responsive Testing
- Browser Compatibility
- Security Testing
- Performance Testing
- SEO Validation
- Accessibility Testing

Deliverables

- QA Report
- Bug Fix Report
- Performance Report

PHASE 07

Launch

Objective

Deploy the project smoothly with minimal downtime.

Activities

- Production Deployment
- Domain Configuration
- Hosting Setup
- SSL Configuration
- Analytics Setup
- Search Console
- Backup Configuration

Deliverables

- Live Website
- Launch Checklist
- Training Session
- Handover Documentation

PHASE 08

Grow & Optimize

Objective

Growth doesn't end after launch.

This phase focuses on continuous improvement based on analytics, customer behaviour, and market trends.

Activities

- SEO Improvements
- Marketing Campaigns
- AI Optimization
- Performance Monitoring
- Feature Enhancements
- Content Updates
- Monthly Reports
- Strategy Reviews

Deliverables

- Growth Reports
- Analytics Dashboard
- Quarterly Strategy Review
- Optimization Roadmap

OUR WORKING PRINCIPLES

Display these as premium glass cards with icons.

Business First

We understand your business before proposing technology.

Strategy Over Trends

We build sustainable systems instead of following short-lived trends.

Transparency

Clear communication throughout every project.

Innovation

We continuously adopt emerging technologies to create better solutions.

Collaboration

Our clients become part of the creative and strategic process.

Long-Term Growth

Success is measured by your business growth—not project completion.

CLIENT JOURNEY

Present the experience from a client's perspective using an illustrated timeline.

1. Initial Enquiry
2. Discovery Meeting
3. Proposal & Quotation
4. Project Kickoff
5. Research & Planning
6. Design Approval
7. Development
8. Testing
9. Launch
10. Growth Partnership

Each stage should include a short explanation and an estimated response time.

PROJECT DASHBOARD PREVIEW

Show a conceptual preview of the dashboard clients will use to track project progress.

Suggested modules:

- Project Status
- Timeline
- Tasks
- Shared Files
- Feedback
- Meeting Notes
- Invoice Status

- Team Members
- Milestones
- Support Requests

Even if the dashboard is introduced later, this preview reinforces Vistaar's transparent working style.

WHY CLIENTS LOVE OUR PROCESS

Display six cards highlighting the benefits of the Vistaar Method.

- Clear Communication
- Defined Timelines
- Dedicated Team
- No Hidden Processes
- Data-Driven Decisions
- Continuous Support

Final CTA

Heading

Every Great Brand Begins With a Conversation.

Supporting Text

Whether you're building your first startup, rebranding an established company, or scaling through AI and technology, our process is designed to turn ambitious ideas into measurable success.

Buttons

Primary

Start Your Journey

Secondary

Book a Discovery Call

UI/UX Recommendations

- Use a sticky timeline navigation that highlights the current phase as users scroll.
- Animate the roadmap with progress lines and glowing milestones.
- Add custom illustrations for each phase instead of generic icons.
- Use alternating layouts to maintain visual interest.

- Keep transitions smooth (250–400 ms) and avoid excessive motion.
- Consider subtle sound effects only if user interaction warrants them (optional and disabled by default).

Developer Notes

- Build every phase as a reusable component driven by CMS content.
- Allow future editing of timelines, descriptions, deliverables, and durations through the admin panel.
- Implement scroll-spy navigation for the roadmap.
- Ensure keyboard accessibility and semantic HTML throughout.
- Lazy-load illustrations and media assets.
- Optimize animations using GSAP or Framer Motion while maintaining excellent performance on all devices.

User Experience Goal

By the end of this page, visitors should understand that Vistaar doesn't rely on guesswork or one-off services. Instead, every project follows a proven, transparent methodology that combines strategy, design, engineering, AI, and continuous optimization to create long-term business growth.

The next logical step is to introduce the people behind this process—showing that Vistaar's success is driven by a passionate team with diverse expertise.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 09 — INSIGHTS

Where Ideas Become Impact.

Creative Navigation Name: Insights

(Instead of "Case Studies" or "Our Work")

Purpose

The **Insights** page is the knowledge hub of Vistaar.

Instead of simply displaying completed projects, this page should demonstrate how Vistaar thinks, solves problems, creates strategies, and delivers measurable business growth.

The objective is to establish Vistaar as an industry authority while simultaneously showcasing successful client work.

Every article, case study, and project should educate visitors and inspire confidence.

Goals

The page should:

- Showcase completed projects.
- Build trust through measurable results.
- Improve SEO through blogs.
- Demonstrate expertise.
- Generate organic traffic.
- Encourage consultation bookings.
- Position Vistaar as a thought leader.

Design Philosophy

The page should resemble a premium digital magazine rather than a simple blog.

Think of a blend between:

- Medium
- Linear Blog
- Stripe Newsroom
- Notion Blog
- Framer Blog

Use large feature images, elegant typography, generous white space, and subtle motion effects.

HERO SECTION

Heading

Ideas.

Strategy.

Results.

Supporting Text

Every successful business has a story.

Discover how Vistaar transforms ideas into brands, brands into businesses, and businesses into growth stories.

User Experience Goal

By the end of this page, visitors should see Vistaar not only as a company that delivers projects but as a trusted source of knowledge and innovation.

They should leave feeling confident that Vistaar understands modern business challenges and has a proven track record of solving them through strategic thinking, technology, and measurable results.

The next logical step is to contact Vistaar and begin a conversation about their own business goals.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 10 — LET'S BUILD SOMETHING EXTRAORDINARY

Contact & Lead Generation

Purpose

The Contact page should be more than a form.

It should become Vistaar's **primary conversion page**, where visitors transition into qualified leads.

Every element on this page should reduce hesitation, answer common questions, and encourage visitors to start a conversation.

The experience should feel welcoming, premium, and effortless.

Design Philosophy

This page should not feel like a traditional "Contact Us" page.

Instead, it should resemble a **consultation booking experience**.

Visitors should feel they are beginning a partnership—not filling out paperwork.

Hero Section

Heading

Let's Build Something Extraordinary.

Supporting Text

Whether you're launching your first startup, redesigning your brand, developing a digital product, or integrating AI into your business, we're here to help you build with confidence.

Background

Animated mesh gradient.

Floating geometric objects.

Subtle particle effects.

Animated glow behind the heading.

SECTION 01 — START A PROJECT

Instead of displaying a basic contact form immediately, ask visitors:

What are you looking to build?

Display interactive cards.

Developer Notes

- Dynamic form logic based on selected service.
- File upload support.
- CRM integration.
- Email notifications.
- Spam protection.
- Google Maps API.
- Calendar integration.
- Analytics tracking for form submissions.

User Experience Goal

Visitors should leave this page feeling that contacting Vistaar is simple, transparent, and the beginning of a long-term partnership—not just another inquiry.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 13 — TECHNICAL ARCHITECTURE

Built to Scale.

Purpose

This chapter defines the technical architecture required to build a scalable, secure, and maintainable website.

The system should be capable of supporting future products, AI integrations, and high traffic without requiring major architectural changes.

Frontend

Framework:

Next.js (App Router)

Language:

TypeScript

without major rewrites.

Developer Notes

Adopt a component-based architecture with reusable UI, centralized state management where necessary, environment-based configuration, automated testing, CI/CD pipelines, and comprehensive documentation for APIs and deployment.

VISTAAR WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

PAGE 14 — SEO, ACCESSIBILITY & PERFORMANCE

Designed to Be Found. Built to Perform.

Purpose

A beautiful website has little value if people cannot find it, use it comfortably, or trust its performance.

This chapter defines the standards that every page of the Vistaar website must meet to ensure excellent search visibility, accessibility, security, and user experience.

The objective is to build a website that is fast, discoverable, inclusive, and technically optimized from day one.

SEO Strategy

Primary Objectives

- Rank for high-intent business keywords.
- Generate qualified organic traffic.
- Establish Vistaar as a thought leader.
- Improve local search visibility.
- Increase conversions from search engines.

Target Keyword Clusters

Branding

- Branding Agency
- Brand Strategy
- Brand Identity Design
- Personal Branding

Web Development

- Website Development Company
- Business Website Development
- Custom Website Development
- Next.js Development

AI & Automation

- AI Automation Company
- Business Automation
- AI Chatbot Development
- AI Workflow Solutions

Marketing

- Digital Marketing Agency
- Performance Marketing
- SEO Services
- Google Ads Management
- Social Media Marketing

Consulting

- Business Growth Consulting
- Startup Consulting
- Digital Transformation
- Business Strategy Services

On-Page SEO Requirements

Every page should include:

- Unique SEO Title
- Meta Description
- Canonical URL
- Open Graph Image
- Twitter Card
- Structured Headings (H1–H6)
- Internal Links
- Breadcrumb Navigation

- Image Alt Text
- Descriptive URLs

Structured Data (Schema.org)

Implement structured data for:

- Organization
- Local Business
- Website
- Breadcrumb List
- Blog Posts
- Articles
- FAQs
- Services
- Job Postings
- Person (Founder)
- Reviews

This improves visibility in search results and enables rich snippets.

Content Strategy

The Insights section should publish content around:

- Branding
- AI
- Business Growth
- Startup Advice
- Web Development
- Marketing
- Technology
- Automation
- Product Design
- Entrepreneurship

Target at least **2–4 high-quality articles per month**.

Technical SEO

The website should automatically generate:

- XML Sitemap
- Robots.txt
- Canonical Tags
- Structured Metadata

- RSS Feed
- Open Graph Images
- JSON-LD Schema

Image Optimization

Use:

- WebP
- AVIF

Implement:

- Lazy Loading
- Responsive Images
- Modern Compression
- CDN Delivery

Performance Standards

Lighthouse Score

Target:

- Performance: 95+
- Accessibility: 100
- Best Practices: 100
- SEO: 100

Core Web Vitals

- Largest Contentful Paint (LCP): Under 2.5 seconds
- Interaction to Next Paint (INP): Under 200 ms
- Cumulative Layout Shift (CLS): Below 0.1

Accessibility Standards

The website should comply with **WCAG 2.2 AA** guidelines.

Requirements include:

- Keyboard navigation
- Visible focus indicators
- Screen reader compatibility
- High color contrast
- Descriptive link text

- Form validation with clear error messages
- Captions for video content
- Alternative text for all meaningful images
- Reduced motion support

Accessibility should be treated as a core feature rather than an afterthought.

Security Standards

The website should include:

- HTTPS
- Secure HTTP Headers
- Content Security Policy (CSP)
- Rate Limiting
- CSRF Protection
- XSS Protection
- Input Validation
- Secure Authentication
- Daily Backups
- Audit Logs

Analytics & Tracking

Integrate:

- Google Analytics 4
- Google Search Console
- Microsoft Clarity
- Meta Pixel
- LinkedIn Insight Tag

Track:

- Website Traffic
- User Journeys
- Conversion Rates
- Form Submissions
- CTA Clicks
- Scroll Depth
- Blog Performance
- Career Applications

Monitoring

Recommended tools:

- Sentry (Error Monitoring)
- UptimeRobot (Uptime Monitoring)
- Google PageSpeed Insights
- Lighthouse CI

Browser & Device Support

Support the latest two versions of:

- Chrome
- Edge
- Firefox
- Safari

Ensure responsive layouts across:

- Desktop
- Laptop
- Tablet
- Mobile

Developer Checklist

Before deployment:

- ✓ All metadata verified
- ✓ Images optimized
- ✓ Structured data validated
- ✓ Forms tested
- ✓ Accessibility audit completed
- ✓ Performance audit completed
- ✓ Broken links removed
- ✓ Sitemap generated
- ✓ Analytics configured
- ✓ SSL certificate active

User Experience Goal

Every visitor should experience a fast, secure, and accessible website regardless of their device, browser, or accessibility needs. Search engines should be able to understand, index, and rank every page effectively.
